Validated Integration

Oracle E-Business Suite

Through the Oracle PartnerNetwork Application Integration Architecture for Partners Initiative, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Comprehensive application acceleration, traffic management, and Web security

Citrix NetScaler 9.1 is a Web application delivery appliance that ensures that applications such as those in Oracle E-Business Suite Release 12.1 are always available and protected.

Company Overview

Citrix Systems, Inc. (NASDAQ:CTXS), is a leading provider of networking and technologies for more than 230,000 organizations worldwide. Its Citrix Cloud Center (C3) and Citrix Online Services solutions and Citrix Delivery Center product family—which includes Citrix NetScaler—radically simplify computing for millions of users, delivering applications to any user, in any location, on any device. Citrix customers include the world's largest internet companies, 99 percent of Fortune Global 500 enterprises, and hundreds of thousands of small businesses and prosumers worldwide. Citrix partners with more than 10,000 companies worldwide in more than 100 countries. Founded in 1989, the company had 2008 annual revenue of \$1.6 billion.

Integration Overview

Citrix NetScaler 9.1 is an integrated Web application delivery controller appliance that provides advanced traffic management through Layer 4-7 content switching and rewrites and redirects. Secure Sockets Layer (SSL) offloading is also performed. NetScaler appliances are available in three editions running on a wide range of hardware platforms. NetScaler 9.1 is available both on hardware appliances (NetScaler MPX appliances) and as a virtual appliance (NetScaler VPX).

Organizations of any size can deploy NetScaler VPX on industry-standard servers anywhere in the data center. NetScaler VPX combines the application delivery functionality of NetScaler physical appliances with the flexibility of a virtual appliance.

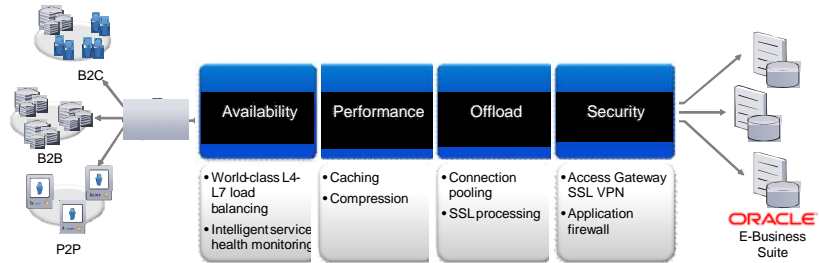

Integration Details

NetScaler 9.1 application delivery controllers are deployed in front of Oracle E-Business Suite Release 12.1. NetScaler 9.1 performs

- L7 content switching
- TCP optimization
- SSL termination
- Content rewriting

Availability
+1.800.437.7503
